Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments:

The functional limitations of claim 1 were discussed with respect to "hemostatic agent" and the triggering of clotting factors. Arguments were presented by counsel that the functional recitation distinguishes over the British patent because the patent tries to avoid clot formation. The examiner indicated that the patent is directed to dextrans crosslinked with epichlorohydrin having substantially the same molecular weights.
